Subject : REPORTING OF BIRD STRIKE

Dear Crew,

Company instructions are reiterated that bird strikes shall always be reported in the Tech Log and the Captain's Debrief Report. In addition, ATC shall be promptly advised so that PCAA is able to take prompt action, and is able to dispatch an Airside/Airworthiness inspector **who verifies the information and conducts a runway inspection**. This also ensures that the bird strike is reflected in PCAA safety statistics so that the risk assessment reflects the actual risks that pilots face in the face of increasing bird activity. These statistics enable PCAA to further coordinate with local authorities and take various measures to ensure that bird activity is reduced in critical areas.

Furthermore, you are requested to fill the paper proforma (Bird/Animal Hit Reporting Proforma) available in the Cockpit and hand it over to a Safety Officer, who will get the information verified and countersigned by a PCAA Airside/Airworthiness Inspector immediately after the event. If a Safety Officer is not available, you may leave it in the flight folder and PIA personnel will follow it up later. Please note that the Captain's name and signature is mandatory in the "Reported By" section.

In case the proforma is not available, or the Crew prefers to use the digital version from the "Crew App", you may fill the name of the PCAA Airside/Airworthiness inspector and that will suffice in place of the signature. In case a PCAA inspector is not available, you shall write the same in the digital proforma. You are also requested to email that proforma to [pkSAFE@piac.aero](mailto:pkSAFE@piac.aero) as soon as possible, since immediate follow-up actions are dependent on that.

Your cooperation will ensure timely action in order to mitigate the bird strike hazard.
