 ATR

Subject : Long Flare

It has been observed that a rising trend of long flares continue through July, 21.
 A smooth landing is not the only criterion for safe landing.
 It is reiterated that crew consult FCTM with regards to this. In addition;
 refer circular: RECIPE FOR A SAFE LANDING. FLT OPS/TRG/27 March 30,
 2021.

It is of utmost importance to reduce this FDM highlight.
 Your cooperation in this regard is imperative for safe conduct of flight.
